

Press Release

September 2016

EURODIA launches Brazilian operations

EURODIA Industrie, the French specialist in industrial purification processes continues its international expansion and announces the recent opening of a Brazilian business unit. This is a new step for this company based in the South East of France (Pertuis) which generates 85 % of its revenues in foreign markets.

After Europe, North America, and Russia, EURODIA further develops its international activities by creating EURODIA ENGENHARIA DO BRASIL (EEDB), a new entity located in the state of São Paulo, Brazil.

EURODIA ENGENHARIA DO BRASIL will be in charge of all EURODIA industrial projects in Brazil, and more broadly in South America, from feasibility studies to implementation. As M. Gillery, CEO and Founder of EURODIA, explains : « *South American markets, and more precisely Brazilian ones, represent huge development opportunities for our company on the dairy, wine production or biotech markets. It became important to set-up a dedicated unit close to our customers.* » EEDB will not only be involved in the downstream phases of the projects, including all commissioning activities but will also offer maintenance services thanks to a dedicated local platform.

Its initial team of three consists of a Process Engineer, a R&D Engineer and a Maintenance Technician. They will work together with the teams based in France and in the US -through AMERIDIA, the company's subsidiary.

R&D activities will represent a significant part of the services offered by EURODIA ENGENHARIA DO BRASIL. This is a priority for EURODIA, which annually devotes 15 % of its operating budget to strategic R&D investments.

About EURODIA SA

EURODIA Industrie SA is one of the world's leading specialists in purification processes for the food industry. Founded in 1988 by its current CEO Bernard Gillery, the company employs more than seventy people. EURODIA Industrie SA has a vast network of agents and licensed distributors spanning five continents, a subsidiary in the United States (Ameridia), and sales offices in China and Russia. EURODIA Industrie SA also works closely with the winemaking industry through its division OENODIA, and leads the field in the sugar, milk, and cheese markets. Through its biotech division Chemistria, EURODIA Industrie SA also offers innovative methods for the production of new chemicals from renewable resources (plant chemistry). In 2015, EURODIA reported revenues of more than €35 million and expects a significant growth for the next three years. More info at www.eurodia.com
